U.S. Patent and Trademark Office PTO-303 (Rev. 04-01) Add	visory Action	Part of Paper No. 9				

Continuation of 2. NOTE: The proposed changes in claim 8 recite "initial signal", however the pending claims only recite a signal. This raises a new issue and would require further consideration.

Continuation of 10. Other: Applicant states Goldberg does not play a message during the processing of the initially detected audible signal. However Goldberg states, "continues to analyze the monitored paramaters during the entire course of the call to assess whether the message was effectively delivered" (column 4, lines 57-60). Hence Goldberg teaches from the point of deliver to the completion of delivery of a prerecorded message, the parameters that were initially monitored continued to be monitored. Therefore Goldberg teaches playing a prerecorded greeting during a time period when when said call classifier is processing said initial audible signal.
